

What are FieldManager® Contractor software users saying?

FieldManager® Contractor is a one-stop program to generate subcontractor contracts and subcontractor payments throughout the project. Once a payment is downloaded from the state, in just a few keystrokes, payment vouchers are created for all subcontractors and yourself.

The degree in which the overall tracking and managing of the projects has improved. Also, being able to manage both MDOT and non-MDOT projects is great, we are now able to use one program in the field and office for all projects.

John Lepien, CL Trucking and Excavating

FieldManager Contractor allows me to easily import bid details from our Bid Express file, assign line items to subcontractors, and input subcontractor bid prices, bonds and dues, and other essential considerations. After receipt of each pay voucher from MDOT, I verify a draft version of the subcontractor pay voucher and simply generate the report. The result is a reduction in administration of subcontractor payments.

Brandie Meisner, M&M Excavating

According to a 2010 survey, 100% of users agree that the FieldManager Contractor software:

- is reliable
- is easy to implement
- reduces paper waste
- reduces redundant data entry and errors
- helps identify discrepancies quickly
- facilitates communication with the owner-agency
- has improved how they do business
- has a helpful customer support team

...and they would recommend the FieldManager Contractor software to other companies like theirs.

FieldManager Contractor software benefits

- Create discrepancy reports comparing the owner-agency contract with your working copy.
- Establish the basis of a subcontract; assign contract items to different contractors, or split them among multiple contractors.
- Easily calculate a subcontractor total dollar amount and track DBE totals.
- Create a daily progress discrepancy by item
- Import your Expedite Bid (.ebs) file or another contract file to create a mirror copy of the owner's contract, or manage your own
- Track costs of personnel, equipment and revenue per day
- Manage any job type
- Specify the quantity for each item to pay to your subs and calculate the dollar amount due, creating the payment reports for subs.
- Export of subcontractor payments and labor and equipment data to accounting
- All of the functionality of the FieldManager Read-Only software, plus much more!
